

A long-exposure photograph of a night flying event. The image features a large, glowing light painting of a figure, possibly a person or a character, created by a series of bright, multi-colored light trails (white, yellow, green, blue) that form the outline and internal details. The figure is positioned in the center-right of the frame. The background is a dark night sky with a few stars and a bright light source in the upper right. In the lower foreground, two small, illuminated RC aircraft are visible on the ground, one of which is emitting a bright blue light. The overall scene is set in an open field at night, with some buildings and trees visible in the distance under a dark sky.
